ANES 2016 Pilot Study
Questionnaire
Version 20160218

Fielding & Sample specifications
- Dates: data collection should begin and end in January, 2016.
- Eligibility: respondents should meet two eligibility criteria:
  o U.S. citizen
  o Age 18 or older
- *n* = 1,200 completions

Programming specifications
- Paging design: display one question per page unless otherwise specified.
- Nonresponse prompting: Unless otherwise noted for a specific item, for every item to which the R fails to respond, please re-display the item once with the following text above it: We noticed that you did not answer the question below. We would be very grateful if you would be willing to provide your best answer, even if you're not completely sure. But if you'd prefer to skip this question, you can click "Next."
- Types: items are "single-punch" radio button responses unless otherwise specified.
- Nonresponse prompt records: record whether or not the nonresponse prompt is shown.
- Missing data and nonresponse codes: Please assign a numeric code to all variables rather than using system missing. Please use the following nonresponse codes:
  o -1: inapplicable, legitimate skip. Use this code when the specified flow through the questionnaire makes a question inapplicable. For example, a "how strongly do you favor that" follow-up question would be coded -1 when the preceding answer was "oppose."
  o -4: other/error: data are missing due to a technical problem.
  o -5: breakoff; the interview was terminated before reaching this question.
  o -7: no answer; the question was displayed to the respondent, but the R clicked "Next" without answering the question.
- Variable names: Names for item variables are in brackets in lower case to the left of each item, such as "[follow]" for the first item in the survey.
- Codes for response options are indicated in brackets. These are not displayed to the respondent.
- Forward/reverse response option order by respondent: randomly assign each R to forward or reverse response option order. When response options in the question stem appear in parenthesis in both orders, randomly display only the assigned order to the respondent.
- Randomization: record all random assignments. Randomize independently.
- Timing: Record all item timings.
- Profile and administrative variables to deliver merged with the data:
  o number of previous panel surveys completed
  o date of panel enrollment
  o date and time of interview completion
  o duration of interview in seconds or minutes (or start and end times)
  o gender (Are you male or female?")
  o race ("What racial or ethnic group describes you?")

  o income ("Thinking back over the last year, what was your family's annual income?")
  o inputstate ("What is your state of residence?")
  o newsint ("…Would you say you follow what's going on in government and public affairs?")

[FEELING THERMOMETERS]

[DISPLAY]
[ftintro]   Please look at the graphic below.

We'd like to get your feelings toward some of our political leaders and other people who are in the news these days. We'll show the name of a person or group and we'd like you to rate that person or group using something we call the feeling thermometer.

Ratings between 50 degrees and 100 degrees mean that you feel favorable and warm toward the person. Ratings between 0 degrees and 50 degrees mean that you don't feel favorable toward the person and that you don't care too much for that person. You would rate the person at the 50 degree mark if you don't feel particularly warm or cold toward the person.

If we come to a person whose name you don't recognize, you don't need to rate that person. Just click Next and we'll move on to the next one.

100°	Very warm or favorable feeling
85°	Quite warm or favorable feeling
70°	Fairly warm or favorable feeling
60°	A bit more warm or favorable feeling than cold feeling
50°	No feeling at all
40°	A bit more cold or unfavorable feeling than warm feeling

[MEASURING RACE/ETHNICITY (OC4)]

[GENERATE RANDOMIZATION VARIABLE RAND_OC4 WITH VALUES 1 OR 2. IF RAND_OC4 =1 DISPLAY PARAGRAPH FOR VERSION A, ELSE IF RAND_OC4=2 DISPLAY PARAGRAPH FOR VERSION B.]

Sometimes more than one racial or ethnic category helps to accurately describe someone. Imagine if our race and ethnicity could be described with a 10 point system

where points are given to whichever racial or ethnic groups we think accurately describe a person.

[VERSION A]   For example, if you think of someone as half-white and half-Asian, you might allocate 5 points to each. Or if you think of someone as mostly black but with some Hispanic heritage, you might allocate 8 or 9 points for African American and 1 or 2 points for Latino.

[VERSION B]   For example, if you think of someone as just Latino, you would allocate all 10 points to Latino. Or if you think of someone as mixed race, but more African American than white, you might allocate 6 or 7 points to black and 3 or 4 points to white.

[PAGE BREAK]

Now think of your own background in racial and ethnic terms. How would you describe your race and ethnicity using this 10-point system?

Assign a number from 0 to 10 in each category so the total is 10.

[africanam10]   ☐ African American
[white10]   ☐ White
[hispanic10]   ☐ Hispanic or Latino
[asianam10]   ☐ Asian American
[nativeam10]   ☐ Native American or American Indian
[other10]   ☐ Other [SPECIFY]
    __ TOTAL [CALCULATE AND DISPLAY THE TOTAL]

[IF R ADVANCES WHEN TOTAL DOES NOT EQUAL 10, RE-DISPLAY THE QUESTION WITH THE "Please assign a number from 0 to 10 in each category so the total is 10." DISPLAYED IN RED.]

[END SURVEY.]

Appendix. Lookup tables for Need for Cognition and Need to Evaluate

This appendix shows the sequences in which items in the Need for Cognition (NFC) and Need to Evaluate (NTE) sections are asked. Both of these sections are adaptive, meaning that the next question asked depends on the answer to the current question.

Each row in the table indicates which item comes next for a specific sequence of prior responses. In row 1, all of the NFC items are still unanswered, so the "next item" is nfc23, meaning that the NFC battery starts with item nfc23. Row 2 shows that if the response to nfc23 is 1, the next question asked is nfc32. Row 3 shows that if the response to nfc23 is 1 and the response to nfc32 is 1, the next item is nfc1. The remaining rows exhaustively document the question sequencing, where -1 indicates item nonresponse.
